POTOSI MINE HAS RICH ZINC ORE

It Is to Be Treated on the Ground in Novel Way.

SUCCESSFUL TESTS MADE

WILL MAKE GOOD SPRINGS FAC-TOR IN PRODUCTION.

Aside from its wonderful showing in gold, silver, lead and copper, the Good Springs district, off the Salt Lake route in Lincoln county. Nevada, promises to become a factor in the production of zinc. In this line the Mahoney brothers and Mark Hopkins are already "blazin½ the trail" for their neighbors by introducing an innovation at the Potosi, where one of the three great bedded veins in the property carries immense bodies of carbonate zinc ore, trial shipments of which have averaged better than 40 per cent in that metal.

Superintendent Mark Hopkins who is

Shaft Down 285 Feet, With Indications of Ore Good.

D. P. Rohlfing, manager of the Frisco Contact and Lulu properties at Frisco, Beaver county, came up yesterday morning and will return to camp tomorrow. At the Frisco, Mr. Rohlfing says, good headway is being made in the sinking of the shaft, but during the last few days the weather has become so hot that it is impossible to keep the shaft free from gases made in blasting. Up to now the running of the Mig bucket up and down the shaft has been all that was necessary to dispel the smoke and frames, but he now finds it necessary to install a blower and it is to secure one that he is now in

and it is to secure out that he is now in town.

The shaft is now down 285 feet and while it is some distance yet, to the lime followed by the interest of the lime in the shaft is the water that is the water that is making. At the present time over 800 gallons per day is making and when greater depth is attained Manager Rohlfing is expecting about 1,200 gallons, and possibly more. As water in that section is very valuable on account of its searcity, he is almost as pleased over its occurrence as he would be over a big body of ore, something he feels certain of when the ledge is opened to the right depth.

of when the ledge is opened to the right depth.

It the Lain he says drifting is progressing on the 400-foot level and while it is some little distance to the first break in the vein conditions are such that he has no doubt of what the near future will show. At and close to all of the breaks or faults in the Horn Silver vein, on which these properties are lecated in the Horn Silver and the same conditions are counted upon to exist in the properties being managed by Mr. Rohlfing, who got his schooling on the existing formation down there in the Horn Silver mine itself.

AT NEW YORK BONANZA.

Management Decides to Begin Operations on Eight Hundred Level.

At the regular monthly meeting of the firectors of the New York Bonanza company, held Tuesday night, little out of the ordinary routine was done. The treasury s said to be in a good, healthy condition and the mine looking first rate, but tothing on the subject was officially reeased.

leased.
It was learned during the day that the water has now practically disappeared from the 800-foot level of the property, and that the opening of it up will begin at once. When the flow of surface water rendered it impracticable to operate there without installing a pump, good ore had been encountered and the prospects were looked upon as being of the brightest. That was about ninety days ago and since that time nothing has been done below the 700 level where, it is said, considerable ground has been opened up ready for stoping. Now that work is to be resumed on the 800, good reports should be coming from the mine before long.

BACK FROM NEVADA.

Mining Engineer Pleased With What

He Saw on a Long Trip.

Arthur W. Jenks, a prominent Montana mining engineer and metallurgist who has been making a four months' round-up of Nevada camps and who was accompanied by Joe S. Free and L. W. Wieks, the latter as assayer for the expedition, is back made the trip largely in the interests of a Montana combination that was out for a chance at something good as demonstrated by development and Mr. Jenks says he was not successful in finding just what was wanted by them.

Adams Con. \$20 Ontario. 400 on the control of the He Saw on a Long Trip.

The best day's trading the mining exchange has experienced for a long time was that of yesterday, when a total of 41,457 shares of stock, with a selling value of \$15.309.63, changed hands. Lower Mammoth, New York and Uncle Sam were the chief performers, and while the trading smacked of profit-taking, and while Lower Mammoth suffered another tumble from the heights to which it soared on Tuesday, the manner in which the stock was absorbed showed that the market is broadening.

MOVING AT FAY.

Deer Lodge Company Awards Contract For 400 Feet of Tunnel.

tract For 400 Feet of Tunnel.

C. A. Short, the well known claim owner and operator of Fay, Nev., came up from the south yesterday morning to remain several days on business requiring his attention on this end of the line. While things are a little quiet at campiust now. Mr. Short says that everybody is confident of the future and that they have a right to be.

E. D. Trenam. of the Deer Lodge Gold Mining & Milling company, has taken a contract to drive the tunnel or the company's ground a distance of 400 feet farther. The tunnel is now in not far from 300 feet, and when the present contract has been fulfilled it is expected that the ledge will have been tappd. This vein, Mr. Short says, is a large one and, as far as developed, shows ore of a splendid milling grade.

California, Montana and Colorado candidronia.

Mr. Short says, is a large one and, as far as developed, shows ore of a splendid milling grade.
California, Montana and Colorado capital is becoming interested in the district to an extent that means big things for the future, and the opinion of every mining engineer who has made any kind of a study of the camp is that it cannot fall to turn out big. Being only sixteen miles off the Salt Lake Route, operations can be carried on at a comparatively modest cost, while the size of the veins and their unusually good milling ores insures long life and permanency, in his osdulon.

Ore and Bullion. Ore and bullion settlements in this city esterday, as reported by McCornick & to, amounted to \$192,400, as follows: Siler, lead, gold and copper ores, \$42,900;

ver, lead, gold and copper ores, \$42,9 base bullion, \$34,500; gold bars, \$25,000. Metal Market.

Silver, 58%c per ounce. Copper (casting), 14%c per pound. Lead, in ore, \$3.50; New York, \$4.50 per 9 pounds.

Mining Notes.

The May Day company is in the mar-ket with two cars of ore. By an overwhelming vote the members of the mining exchange decided to cease business at noon today and help the Elks celebrate.

The Pioneer sampler yesterday reported two cars of ore from Alta, two from Bingham, two from Tintic and one each from Big Cottonwood and Stockton. Three cars of ore from Tintic, three from Bingham and four from Nevada were reported as being among the re-ceipts at the Taylor & Brunton sampler vesterday.

ceipts at the Taylor & Brunton sampler yesterday.

Manager B. F. Cornish of the Pioche-Nevada Consolidated came up from camp yesterday, morning. He says the weather is extremely hot down there and that little is doing in consequence.

There are rumors in Boston that United States Mining will be turned over to another company, which will form the nucleus of a large smelling combination in competition with the American Smelting & Refining company.

Tony Jacobson, manager of the Columbus Consolidated, stated yesterday that he had sold his stock in the South Columbus company and resigned as a director. He left for Long Beach, Cal., last night to join his wife and family, with whom he expects to return home in a few days.

Superintendent J. P. Turner of the Star Cornellidated Teachers.

Between three and four feet a day is being made.

Superintendent C. C. Griggs of the Uncle Sam reports to Manager John Dern that conditions on the 50-foot level below the tunnel continue to steadily improve, while the 300 and winze workings present nothing new. All of this new territory in the Uncle Sam will be producing heavily in the near future.

Manager Thomas Weir has just returned from a visit to the Alax following his trip to Colorado. He says there is nothing particularly new to report, though the mine looks anything but discouraging. Tintic, Mr. Weir states is greatly elated over the way in which the Lower Mammoth is responding to development and great confidence in its future is shown.

David Evans, manager of the Black future is shown.

David Evans, manazer of the Black Jack and Great Western companies' properties, is over from Venice. Cat. to look after his interests here. He expects to visit the Great Western, at the Lead of Big Cottonwood, and the Black Jack, also, just as soon as he can get in communication with Uncle Jesse Knight, who is largely interested in each and whom Mr. Evans would like to have accompany him on his trips to the properties.

eccompany him on his trips to the properties.

Superintendent A. O. Jacobson of the Columbus Consolidated was down from camp yesterday. He says that his company is maintaining the sprinkling wag on on the canyon roads and pays for two men who are constantly at work upon it, in addition. The county has been doing a little, but he feels it ought to do more, while some of the other operating companies ought to join with the Columbus Consolidated in keeping the road down the canyon in shape for the heavy traffic it now has to stand.

F. J. HILL DRUG CO. Corner Second South and West Temple

St. Louis Wool.

St. Louis July 26.—Wool—Steady. Medium grades, combing and clothing, 2000 city, Utah. Notice is hereby given that at a meeting of the board of directors held on the 30 due. 1905. an assessment of three (3) cents per share was levided on the capital stock of the corporation, payable immediately to W. R. Wightman, secretary, at the office of the company, room 3. Masonic block, Salt Lake City, Utah. Any stock on which this assessment may remain unpaid at the close of business on the 31st day of July, 1905. Shall be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold at 10 o'clock a. m. on August 18th, 1995, to pay the delinquent assessment. Cogether with the cost of advertising and expense of sale.

W. R. WIGHTMAM Secretary. NAILDRIVER MINING COMPANY.

Notice.

NOTICE IS HEREBY GIVEN THAT the Continental Market company, a corporation organized and existing under the laws of the State of Utah, has made its voluntary application in the Third Judicial District court of the State of Utah, in and for the County of Salt Lake, being the county where its principal place of business is situated, for a dissolution of said corporation, and any objections to said application are required to be filed within thirty days from the date of the first publication of this notice, to-wit: the 8th day of July, A. D. 1905. (Seal.)

J. U. ELDREDGE, Jr., Clerk.

By W. H. FARNSWORTH, Deputy Clerk.

NOTICE IS HEREBY GIVEN BY THE city council of Salt Lake City of the intention of such council to make the following desertibed improvement, to-wit:

Constructing a cement sidewalk six feet wide and four inches thick on both sides of First South street between Fourth West and Ninth West streets, in sidewalk districts Nos. 20 and 21, and defray the abutters' portion of the cost and expense therof, estimated at five thousand eight hundred twenty-one and twenty one-hundredths (\$5,821.20) dollars, or ninety one-hundredths (\$0,90) dollars per front or linear foot, there being 6,468 feet abutting said improvement, by a local assessment upon the lots or pieces of ground within S. C., says: "For years, my wife suffered intensely from dyspepsia, compleated with a torpid liver, until she lost her strength and vigor, and became a mere wreck of her former self. Then she tried Electric Bitters, which helped her at once, and finally made her entirely well. She is now strong and healthy." Z. C. M. I. Drug Dept. sells and guarantees them, at 50c a bottle.
